Professional Summary

- AI program manager with expertise in business operations, business systems analysis, product strategy, AI agents, and workflow orchestration for AI platforms
- Co-founder of Mammoth Investing Inc with hands-on experience in launching & scaling fintech products
- 4+ years of experience in Artificial Intelligence strategy, large language models (LLMs), generative AI, data quality, and continuous improvement, applying quantitative analysis to develop business strategies and support investment research
- Ranked top 10 of 4,100 teams at Harvard business school's 2025 global business case mergers and acquisition competition

University of Massachusetts

MS - Business Analytics [STEM] - 3.75/4.0

Amherst, MA

Sep 2024 - Dec 2025

Symbiosis International University

B.Tech - Computer Science [STEM], Specialization in AI/ML - 3.0/4.0

Pune, India

Jul 2019 - Jun 2023

Skills Summary

- **Languages, Tools:** PostgreSQL, SQL (3+ years), Python (2+ years), Tableau (3+ years), MS Suite (Microsoft Word, Excel, MS Project, Pivot tables), Confluence, MicroStrategy, Jira, Cursor, Claude Code, Antigravity, Actimize, SharePoint
- **Competencies:** Business Intelligence, Cross-functional stakeholder management, statistical analysis, risk analysis, statistical financial modeling, Scrum, Agile, QA (testing), DevOps, data visualization, Lean, Six Sigma
- **Certifications:** Advanced Python for Data Science (Edx), Software & Agile Practices (Coursera), GenAI in Data Analytics (Meta), Fundamentals of Microsoft Azure (DataCamp), Introduction to Alteryx (DataCamp)

Professional Experience

Mammoth Investing Inc

New York, NY

Co-Founder

Dec 2024 - Aug 2026

- Co-Founded a B2C FinTech startup, leveraging AI agents, generative AI, Excel, database management, data analytics, and robotic process automation (RPA) for risk monitoring and financial research, improving data quality by **75%** and enabling informed investment decisions in under 10 seconds.
- Mapped PII across 3 data sources and implemented consent and deletion workflows, closing 4 of 5 gaps identified in a self-assessment against GDPR Articles 5, 15, and 17
- Spearheaded A/B testing for investment product features, increasing session duration by **25%**, while partnering with the Project Management Office (PMO) on scheduling, budgeting, and project documentation for product listings
- Developed a predictive model using Salesforce CRM campaign data to optimize budget allocation, tracking key metrics and applying financial analytics and risk models to improve operational efficiency and credit risk management, increasing leads by **30%** in Q1.

Zensar Technologies Limited

Pune, India

Business Analyst

Jan 2023 - Aug 2024

- Developed an attrition model using Python and SQL within an agile software development team, delivering KPI reports to HR leadership and achieving **90%** retention across **10k** employees
- Conducted variance analysis and developed test plans for Oracle and SAP module integration, supporting the software development lifecycle through project documentation, process automation, and seamless data flow, resulting in **75%** faster data processing and successful audits.
- Digitalized project tracking through Power BI dashboards, DAX, across the software development lifecycle, automating reports and processes for HR and IT stakeholders, increasing adoption by **40%** and improving operational efficiency
- Led business systems analysis through business requirements gathering with 20+ stakeholders, defining user stories and process models for a new HR system, resulting in a **33%** reduction in development time

Projects

Requirements-to-Test-Plan AI Agent

Apr 2026 - June 2026

- Built a multi-stage LLM agent (Claude, Py, JSON) generating Jira TC from transcripts/docs with **94%** traceability.
- Built an LLM eval framework (50 ref. stories improving testability to **78%** through pipeline decomposition
- Implemented automated req. conflict detection, achieving **91%** precision / **88%** recall on seeded benchmarks, preventing ambiguous requirements pre-dev

Hybrid Trading Algorithm (Volatile Markets)

Nov 2025 - Mar 2026

- Developed high frequency trading algorithm achieving gains exceeding 0.75% a day leveraging business intelligence
- Integrated PLSTM with TAL and CNN designing the System Architecture to identify optimal stock entry and exit points
- Developed Long-Range financial forecasts based on trading algorithm performance, improving prediction accuracy by **12%**
- Lowered prediction error by 15% with refined & validated back testing for 6 months

Amazon Prime Air Hub Detection (Supply Chain Optimization)

Sep 2025 - Dec 2025

- Designed a 90-hub delivery network, utilizing GIS, optimizing delivery time and population coverage
- Performed hypotheses testing on various hub location strategies to validate optimization models and ensure data-driven decision-making
